## PERSONAL STATEMENT

A US-based senior penetration specializing in web application security, with a 5-year track record in the industry. Holding an MSc in Cyber Security from the National College of Ireland and having developed a diverse arsenal of industry-standard tools and techniques, driven by a strong will to excel. Expertise lies in assessing application security risks and generating effective solutions, often within tight deadlines, all while maintaining the highest professional standards. An inherent drive for excellence fuels a commitment to task completion, technical certification attainment, and tackling progressively intricate projects. Passionate about advancing the Cyber Security field, shedding light on pressing issues, including rising privacy concerns, insecure app development practices, and the harvesting of private personal data.

## WORK EXPERIENCE

### KPMG (06/2022 - Present)

#### Senior Web Application Penetration Tester Specialist

- *Facilitating the testing engagement process from start to finish, including establishing scope, coordination with development teams and stakeholders, execution, reporting, and debrief.*
- *Utilizing industry standard tools including Postman, SOAPUI, Invicti, and Burp Suite to execute web application and web service engagements.*
- *Developing comprehensive findings report for clients including remediation recommendations and walk-through replication guides.*
- *Engage with technical and non-technical audiences to articulate testing process, techniques, and results while guiding audiences on remediation options.*
- *Partner with teams to develop testing techniques and mentor junior team members on tools and techniques used when performing tests.*

### Information Security Collective (07/2021-Present)

#### Founder and Operations Director

- *Founded and overseeing a 501(c)3 non-profit organization aimed at improving diversity, inclusivity, and accessibility within the information security community.*
- *Conducting community outreach and member recruitment initiatives through social media and organizational meetings*
- *Partnering with information security community members to advance organizational objectives through mentoring, program development, and presentations.*

### NetSPI (09/2020-06/2022)

#### Cyber Security Consultant

- *Utilizing industry standard tools including Nmap and Burp Suite to perform web penetration tests and execute Penetration Testing as a Service engagements.*
- *Developing comprehensive findings report for clients including remediation recommendations and walk-through replication guides.*
- *Working directly with client team members to cover test findings, plan remediation actions, and validate implemented remediation attempts.*
- *Engaging in pre-testing kickoff calls, partnering with clients to determine testing scope, outline expected testing behavior, and address questions and concerns.*

### Nike (via AP Professionals) (1/2020-08/2020)

#### Cyber Security Advisor

- *Utilized tools including Nmap, and Burp Suite, and Fortify to perform web, and mobile penetration testing, and source code review.*

- *Developed comprehensive findings report for project stakeholders including remediation recommendations, proof of concept exploitations, and business impact assessments for a technical and executive-level audience.*

*EY (Formerly Ernst & Young) (12/2018-08/2019)*

*Cyber Security Advisor*

- *Utilized industry-standard tools including Nmap, Nessus, and Burp Suite to perform network, web, and mobile penetration testing, and source code review.*
- *Performed mobile application penetration tests for a Multinational Oil and Gas Organization*
- *Performed network penetration tests for a Multinational Financial Technology and Services Organization*
- *Performed web application penetration tests for a Multinational Oil and Gas Organization, and a Governmental Infrastructure Service*
- *Performed perimeter penetration tests and Open-Source Intelligence gathering for a Global Investment Management Firm*
- *Developed comprehensive and accurate findings reports for client organizations.*

*EY (05/2018-08/2018)*

*Cyber Security Intern*

- *Performed host-based vulnerability assessments for a large international financial institution*
- *Assisted client-site and on-premises engagements related to Cyber Program Maturity Assessments and Cyber Security Frameworks (including the NIST CSF and ISO 27001)*
- *Aided a discovery engagement relating to GDPR regulatory compliance by researching current market solutions and attended client meetings to improve consultancy skills.*

## CERTIFICATIONS

### **eLearnSecurity**

- **eWPTX (eLearnSecurity Web Application Penetration Tester Extreme) – Certificate ID: 8548256**
- **eWPT (eLearnSecurity Web Application Penetration Tester) - Certificate ID: 6914292**
- **eJPT (eLearnSecurity Junior Penetration Tester) - Certificate ID: 7180368**

## TECHNICAL EXPERIENCE

### *Languages*

- *JavaScript, Python, MySQL, C++, HTML, CSS*

### *Platforms*

- *Windows (Vista, 7, 8, 10), Linux (Ubuntu, Kali), Android, iOS*

### *Software*

- *Burp Suite, Nessus, Metasploit, Nmap, Wireshark, Mobile Security Framework, Invicti, Postman, SOAPUI*

## EDUCATION

### **The National College of Ireland, Dublin, Ireland (09/2017-09/2018)**

*Master of Science (M.Sc.), Cyber Security*

*Thesis: Practical Application of the NIST Cybersecurity Framework Across Enterprise Environments*

### **The College of Idaho, Caldwell, ID (08/2013-05/2017)**

*Bachelor of Science (B.S.), Physics*
